Fix what matters

WCAG 2.1 — what it actually means

Perceivable

Can users perceive the content? Covers contrast, alt text, captions.

Contrast runs 3 specific checks for this principle: 1. Color contrast for normal and large text. 2. Alternative text presence and quality for all img tags. 3. Typography legibility across viewport sizes.

Operable

Keyboard navigation, focus indicators.

Understandable

Language, error messages, consistent nav.

Robust

Semantic HTML, ARIA roles.
